IT ALL STARTED WITH COCOON...

Flos was founded in 1962 in Merano, Italy with the aim to develop a line of new lighting concepts utilizing a material called the cocoon, a spray-on plastic coating made in the United States, and a novelty in Italy at the time. The company enlisted the support of Achille and Pier Giacomo Castiglioni and Tobia Scarpa, who successfully produced a line of lighting products that are still in production today.

In 1964 Sergio Gandini joined the company, and the company headquarters was moved to a new site near Brescia, Italy. The first Flos retail store, designed by the Castiglioni brothers opened in Milan in 1968.

From the very outset, the distinguishing feature of the company has been its approach to lamp design and production in the highest quality. Flos has always worked with well-known and established designers starting with the Castiglioni brothers and Tobia Scarpa, who were followed by Philippe Starck, Konstantin Grcic, Jasper Morrison, Marc Newson, Antonio Citterio, Ron Gilad, Patricia Urquiola, Marcel Wanders, to name a few. Collaborations with this international roster of talents have resulted in some of the best-known and commercially successful products in industrial design. It has also resulted in numerous awards and accolades for both the designers and the company. Flos products are also included in many permanent collections of design and art museums around the world.

Since 1996 Flos is led by Sergio's son, Piero, and the company has grown into an international organization that offers a complete range of residential, commercial and even custom-made lighting products. The company's contract division assists architects with the know-how it has acquired over forty years of experience not only as a manufacturer, but also as a specialty lighting systems designer for a wide-range of environments. With its tireless pursuit of innovation and cutting-edge technology, Flos has firmly established itself as a global leader in lighting design.

Flos remains true to its origins as a company and strives to consistently uphold the following "Flosophy":

- Be THE solution to all lighting needs
- Retain identity as a true "Italian Design Factory"
- Work with the best designers
- Invest in researching innovative materials and technology
- Create products with iconic and symbolic appeal

Flos is also a company fully committed to environmental issues, constantly developing products that are least harmful to the environment both in terms of material and in the production methods it employs.
